

WACP
SERIES

The automatic
wrap-around case packers

General features

- ▶ Pallet-height automatically detected with in-line infeed
- ▶ Blank magazine at fixed height, equipped with motorized conveyor
- ▶ Blank magazine capacity: 300-400 pcs
- ▶ Automatic park collation
- ▶ One-row or multi-row infeed
- ▶ Motorized transversal hot melt glue applicator, controlled by inverter and encoder
- ▶ Operator interface 7" full-colour touch screen sliding all along the length of the machine

A great alternative to shrink wrapping

The automatic wrap-around case packer has been designed to pack a large variety of products and to meet the highest production standards and quality regulations.

Its compact design decreases the need of big spaces to operate, and thanks to its highly technological components, it is possible to obtain high productions in reduced times.

It can reach productions up to 25 packs/minute.
